All products are bulk packed and sold by weight.

CUSTOMER COMMITMENTS AND PACKAGING

Customer Commitments and Shipping Information

Customer satisfaction ranks high at French Gourmet. The company stands behind the quality of its products and further backs it with technical assistance.

Unsurpassed Value

Each case contains product and labor. Although it is not always perceived as such, skilled labor is included in every case, since the product is 97% finished. When comparing the price of a finished product that includes hidden advantages like direct labor savings, maximum convenience and waste reduction, it becomes easier to see the positive impact and contribution these savings have on your profit.

Customer Service

French Gourmet personally keeps in direct contact with customers who ultimately bake the product. This is

achieved through its network of independent manufacturer representatives who are factory trained and located in different parts of the world. Pastry Chefs further support this network. Additionally, the company keeps communication with its distributor network. By going one-step further, French Gourmet gains direct feedback. Responsiveness to requests and comments is instantaneous, ensuring that all needs are met, thus providing customers with total satisfaction and peace of mind.

Technical Support and Training

French Gourmet offers on-site support. Upon request, its technical advisors will train staff in the proper handling and baking to acquire the baking results and satisfaction the brand delivers.

Temperature Control

French Gourmet's Artisan Frozen Dough leaves the plant in prime condition. To insure product integrity is maintained, French Gourmet takes quality control beyond their dock by tracking the temperature of each and every container shipped from the plant to both of their East and West Coast warehouses where stock is readily available.

Shelf Life

The croissants, Danishes, puff pastry sheets, strudel and muffin batter have a shelf life of one year when stored at -10° F (-23° C). The bulk dough slabs, sheets, and logs have a shelf life of six months at -10° F (-23° C). Shelf life varies when storage temperature fluctuations exist. (See thermometer.)
